All, BLUF, I would like to have our call today but short to not waste your time. The attached report is maybe a 40% document. I sincerely apologize for that, been putting out fires on too many fronts past few weeks. What I would like to do is ask you each to not waste any time reading it but take 10 min to look at sections and example content and let me know if this is on track or way off base on our call.

I would like to get this completed for concurrent review on Tuesday morning, if that works? I know this has dragged on too long and want to get it done. Completely on me, and not how I like to or normally do things.

Dave

Wayne, I think Wed report, call Thursday, would be best.

Thank you
Dave

Dave –

Understood. Unless Stuart still wants to have a call this week let's reschedule for next week. Is it doable to get us a report by Tuesday, with a call on Wednesday?

Wayne and Stuart, I apologize, but our report is not going to be ready this week. I recommend we postpone another week, but if you would like to talk tomorrow we still can. I hate to blame it on COVID but it is what it is. FYI: Jon has had issues with connection and computer. I have been working shutting down our Maywood Site due to a positive COVID case. As such, I have not been able to work on the report the past week.

My calendar is clearing given the site shut down. So I do believe another week is sufficient.

Wayne,

Our goal is to have a draft on Tuesday.

We are all available for a call Thursday afternoon.

Dave, Julie, and Jon –

Thanks for the update. We're all facing challenges in trying to keep the work moving.

The plan is still to get Stuart and me a draft report and follow up with a call? If so, is it doable to get us the draft report Monday or Tuesday, and plan for a call Wednesday or Thursday of next week?

My connections keep getting dropped, like a lot of other EPA folks. Speed wise it is much better this week than last. Actually with the improved work on EPA's end and me having FIOS, my pc is working better now than it ever does in the office.

My situation is the same as Dave's. Connections have been sloooooow (or nonexistent!).

Ok, thanks David. I understand computer problems, I was just able to access EPA's intranet yesterday afternoon and my work drives on Monday. I am still trying to get access to our old email system to find some emails from 10 years ago.

Stuart, I have had significant computer and connection issues the past 2 weeks. I have been trying to continue this effort but been slow. I think they have finally gotten me to about 90% capability. I am not sure of Jon and Julie's status but I need another week if possible.

Hope you and family are well.

Dave

I wanted to check on how the analysis is progressing? I was getting asked at HQ if this was still progressing with the ongoing virus crises. I hope everyone is doing well and safe.
